Retransmitted with compliments to the Secretary
Government, Development Department.

The proposal of the Sanitary Board may be approved
and sanctioned, only effect should not be given to the
same till the water supply situation on the field
improves.

Owing to shortage of rain this year, the Betha-
mangala tank has run low and if the October rains fail,
the situation will become anxious. Every effort has
therefore to be made to conserve what water there is,
the draw being minimised. Any extension like the
one now proposed would involve additional draw.

This question was discussed with the President,
Sanitary Board during my visit to the field. He is
agreeable to deferring execution of the work of
extension of water supply to the religious and charitable
Institutions in Andersonpet till the situation improves.
